Natural Gas Rate Case

In February 2020, PSCo filed a rate case with the Colorado Public Utilities Commission (CPUC) seeking a net increase to retail gas rates of $126.8 million, reflecting a $144.5 million increase in base rate revenue, partially offset by $17.7 million of costs previously authorized through the Pipeline Integrity rider. The request was based on a 9.95% return on equity (ROE), an equity ratio of 55.81% and a historic test year as of Sept. 30, 2019, adjusted for known and measurable differences for the 12-month period ended Sept. 30, 2020. In June 2020, PSCo revised its net increase to $121 million, reflecting updates to the test year including actual plant additions, revenue and capital structure through April 2020, the CPUC Staff’s recommended weather normalization and other items.

On July 10, 2020, PSCo, the CPUC Staff and various intervenors filed a comprehensive unopposed settlement, which results in a net increase to retail gas rates of $76.9 million, reflecting a $93.7 million increase in base rate revenue, partially offset by $16.8 million of costs previously authorized through the Pipeline Integrity rider. The settlement is based on:

- A ROE of 9.20%;
- An equity ratio of 55.62%;
- A historic test year as of Sept. 30, 2019, utilizing a year-end rate base, and incorporating a known and measurable post-Test Year adjustment for the annualized revenue requirement associated with the Tungsten to Black Hawk pipeline as of April 30, 2020; and
- Rates will be implemented on April 1, 2021 and will be retroactively effective back to November of 2020.
